Project 2:

Client: **CITI Bank**

Duration: May 2021 to June 2022

GDR Trade

Project Description:

The Global Deal Review (GDR)/ Regional Deal Review (RDR) team intends to leverage the existing ICG Toolbox/ CRM Approvals capability to digitize the GDR submissions and automate the approval workflow.

The objective of the project is to digitize the GDR submissions and automate the approval workflow, reduce production time for trade transactors, improve submissions accuracy, and facilitate the documentation of meetings minutes while replacing the current manual process. Users should be provided with easy access/ navigation to various screens needed for managing deal team members, attachments, reports and audit trail.

Trade Memo (Open Ended Memo) Project

Description:

Guarantees and SBLC's are instruments issued within Trade Documentary Services at the request of a CITI Client. Guarantees will typically have an expiry date included in the instrument, however in some cases the beneficiary of the Guarantee may request that the instrument and these are classified as 'Open Ended'. Due to the increased risk that these Open Ended Guarantees pose, the ICG risk policy states that each country that issues such instruments should have an Open Ended Country Memo which is reviewed annually.

The objective of the project is to digitize the creation, review, approval, monitoring and tracking of Open Ended Memo created across all industries, regions, and businesses within ICG Risk and Business Units.

Issuer Application

Project Description:

Providing a simplified flow to managing deals in CRM system and removed the unnecessary manual steps and speedup the deal movement within CRM, User has been provided with easy access, navigation, manage deal team members, Attachments, Reports and Audit Trail.
